Vaello
LA VALENCIANA

Vaello

LA VALENCIANA

Vaello Campos S.L. is a Spanish family-owned company based in Aielo de Malferit (Valencia), dedicated since 1950 to the manufacture of kitchenware under the La Valenciana brand. With a long artisanal tradition and a strong commitment to quality, it designs and produces paella pans, frying pans, griddles, and burners that combine functionality, durability, and authentic Spanish craftsmanship.

New era, same passion

At Vaello Campos, La Valenciana, we look to the future without forgetting our roots. We are embarking on a new era marked by innovation, design and continuous improvement, while maintaining the passion for tradition that has accompanied us for generations. This catalogue is an invitation to discover the world of Vaello, where we present our entire range of products as a reflection of a history based on constant evolution and adaptation to changing times.

General Information

General Information
This catalog is for informational purposes only. Products, technical specifications, and finishes are subject to change without prior notice. For prices, commercial conditions, and delivery times, please refer to our sales department. Images provided are for reference only and may not correspond exactly to the final product.

Technical Information
The indicated measurements and characteristics are subject to manufacturing tolerances. This catalog does not constitute a commercial offer. Please check availability, prices, and special applications. For technical advice, quotations, or additional information, our sales team will be pleasedto assist you.

Use and Applications
Our products are designed for domestic and professional use, adapting to different types of cooking and environments. For specific applications or intensive use, we recommend referring toour sales department.

Warranty and Technical Service
Vaello Campos · La Valenciana products are covered by a 3-year warranty, in accordance with current legislation, covering possible manufacturing and material defects. The warranty does not cover damage resulting from improper use, normal wear and tear, lack of maintenance, or incorrect installation. For furtherinformation, please seethe full warranty conditions or contact our customer service department.

Maintenance and Cleaning
To ensure optimal performance and prolong the lifespan of Vaello Campos · La Valenciana products, it is essential to follow simple maintenance and cleaning guidelines specific to each type of material.

Polished Steel
After each use, wash with warm water and liquid soap. Dry immediately to prevent rusting. Apply a light coat of oil to the surface before storing, especially if it will not be used for an extended period of time. Not dishwasher safe.

Enamelled Steel
The enamel coating makes cleaning easier and protects the product from corrosion. Wash with mild detergent and a non-abrasive sponge. Avoid knocks or metal utensils that could damage the coating. Dishwasher safe, although hand washing is recommended to preserve the original shine and finish.

Stainless Steel
Highly durable and easy to maintain. Can be washed with water and conventional detergent or in the dishwasher. In order to preserve its original appearance, it is recommended to dry after washing and avoid chlorine-based or abrasive products. For stubborn stains, use specific stainless steel cleaners.

Cast Iron
Before first use and after each cleaning, dry thoroughly and apply a thin layer of oil to protect the surface. Preferably hand wash, avoiding aggressive detergents and dishwasher use. Do not soak or store in a damp place. Proper maintenance improves its properties over time.

Correct Use of Pans and Burners According to Diameter
To achieve optimal cooking results, it is essential to use a burner with a diameter suitable for the size of the paella pan. A burner that is too small will not distribute heat evenly, while one that is too large may cause overheating at the edges. The paella pan should be centered on the burner, ensuring that the flame reaches the entire base evenly. Correct use of the burner improves energy efficiency and ensures uniform cooking.

Safety Recommendations for Gas Use
Burners must always be used according to their design and intended purpose. Models designed for indoor use must only be used in appropriate indoor spaces, while burners designed for outdoor use must only be used outdoors. It is essential to place the burner on a stable, flat, and heat-resistant surface, ensuring proper ventilation during use. Keep flammable materials away, do not leave the equipment unattended, and turn off the gas valve once cooking is finished.

Contact
For commercial information, personalised quotes, or technical advice, do not hesitate to contact our sales department:

MAINTENANCE ACCORDING TO MATERIAL

Each material has its own characteristics that influence both its use and maintenance. Following a few simple recommendations will keep your cookware in optimal condition for longer and ensure the best results every time you cook.

Polished steel

Polished steel is the traditional material used for Valencian paella pans, highly valued for its excellent heat conduction.

After each use, it is recommended to wash the pan by hand with hot water and mild detergent, drying it thoroughly to prevent rust from forming. It is advisable to apply a thin layer of oil to the surface before storing it, especially if it will not be used for a long period of time. If small rust spots appear, they can be easily removed with a soft scouring pad and the surface re-oiled.

Stainless steel

Stainless steel stands out for its durability, corrosion resistance and easy maintenance.

After each use, simply wash the item with soap and water and dry it thoroughly. If there are any stuck-on residues, you can soak it before cleaning. To preserve its original appearance, it is recommended to avoid abrasive products and use soft sponges. It is an ideal material for frequent and prolonged use.

Enamelled steel

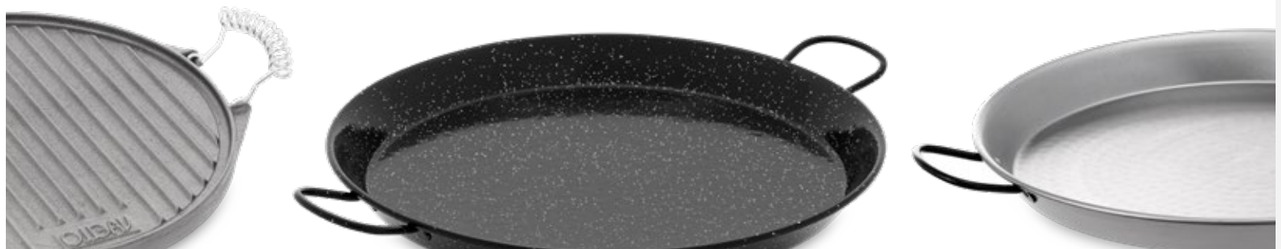

Enamelled steel combines the strength of steel with the protection of enamel, making it easy to maintain and clean.

It can be washed comfortably with water and detergent, without the need to oil the surface after use. The enamel protects against rust, so no special care is required. It is recommended to avoid strong impacts or the use of aggressive metal utensils that could damage the enamel.

Cast iron

Cast iron is a robust material with excellent heat retention properties, ideal for even cooking.

It is advisable to wash the piece by hand and dry it carefully to prevent moisture build-up. As with polished steel, it is recommended to apply a light coat of oil after cleaning to protect the surface. With use, cast iron develops a natural patina that improves its non-stick properties and protects the material.

Tips for making the perfect valencian paella

Traditional Ingredients

Authentic Valencian paella is prepared with simple, high-quality ingredients:

- Rice
- Chicken
- Rabbit
- Flat green beans (bajoqueta)
- Large white beans (garrofón)
- Tomato
- Olive oil
- Paprika
- Water
- Salt
- Saffron

Respecting the traditional recipe and using quality ingredients are the basis for a good result.

Proportions and Portions

As a guideline, it is recommended to use between 80 and 100 g of rice per person. The usual liquid-to-rice proportionis three parts water to one part rice, adjusting according to the type of rice and the intensity of the heat. The rice should be spread evenly in a thin layer across the entire surface of the paella pan.

Preparation Process

Heat the oil in the paella pan and evenly brown the chicken and rabbit. Add the flat green beans and large white beans, continuing to sauté until the ingredients are well integrated. Stir in the grated tomato and paprika briefly, taking care not to burn them. Add the water, season with salt, and let it boil to create a flavorful broth. Once the broth reaches the right point, add the rice,spreading it evenly, along with the saffron. Do not stir the rice during cooking.

Heat Control

Maintain a steady boil during the first few minutes and gradually adjust the heat as cooking progresses. Proper heat control is essential to ensure the rice cooks evenly and reaches its optimal texture.

Final Rest

Once cooking is complete, remove the paella pan from the heat and let the paella rest for 5 to 10 minutes before serving. This resting period allows the rice to settle and the flavors to blend, achieving the characteristic result of authentic Valencian paella.

Since 1950, we have been manufacturing paella pans, frying pans and burners, with a commitment to combining tradition, innovation and quality. Our products are designed to be part of those moments that bring people together around the fire and good food.
